REFERENCE NOTES

1. CAN BE USED AS A 'BODY STAIN' AT HIGH TEMPERATURES, ALL OF THE BROWN COLORS CAN BE USED AS 'BODY STAINS', BUT WILL VARY IN SHADE CONSIDERABLY DEPENDING ON THE COMPOSITION OF THE BODY AND TEMPERATURE AT WHICH IT IS FIRED.

1A. USE ONLY AS 'BODY STAIN'.

FIRING TEMPERATURES CAN ONLY BE A ROUGH GUIDE. FIRING AT 2200F ON A SLOW SCHEDULE MAY GIVE THE EQUIVALENT MATURING AS FIRING AT 2300F ON A FAST SCHEDULE. THE CYCLE, ATMOSPHERE AND RATE OF COOLING WILL ALL AFFECT THE COLOR.

2. MAX FIRING LIMIT 2156F (1180C).

3. MAX FIRING LIMIT 2300F (1260C).

4. MAX FIRING LIMIT 1976F (1080C).

ZINC OXIDE INFLUENCES THE COLOR IN A GLAZE MORE THAN ANY OTHER ELEMENT. GENERALLY, ZINCLESS GLAZES SHOULD NOT CONTAIN MAGNESIUM OXIDE. SOME COLORS CONTAINING ZINC ARE TO BE USED IN A ZINCLESS GLAZE. THE ZINC IN THE COLOR IS IN A COMBINED FORM AND WILL NOT HARM THE COLOR, BUT FREE ZINC OXIDE IN THE GLAZE CAN DESTROY THE COLOR.

5. DO NOT USE ZINC IN GLAZE.

6. MAY BE USED WITH ZINC OR WITHOUT ZINC.

7. ZINC NOT NECESSARY, BUT GIVES BETTER RESULTS.

8. BEST RESULTS WITH NO ZINC.

CALCIUM OXIDE CONTENT AS CALCIUM CARBONATE SHOULD BE BETWEEN 12-15% FOR THE BEST COLOR DEVELOPMENT. ADDING THE MOLECULAR EQUIVALENT OF CALCIUM OXIDE WITH WOLLASTONITE, A NATURAL CALCIUM, SILICATE, OFTEN GIVES BETTER UNIFORMITY. THE INCREASED SILICA FROM THE WOLLASTONITE MUST BE SUBTRACTED OR THE GLAZE WILL HAVE A POOR SURFACE.

9. GLAZE MUST CONTAIN 6.7 TO 8.4% CaO(12-15% CaCO₃).

RAKU GLAZES (CONE 06)

04/09/21

Color	1lb	5lb	10lb	25lb	Pint	Quart	Gallon
Blue Flash	\$5.00	\$22.00	\$40.00	\$95.00	\$14.00	\$22.00	\$85.00
Creates a wonderful array of medium to deep blues. Great on smooth pieces. Don't forget it melts at a low temp. Gloss Finish. Beware of runs.							
Blue Silver Luster	\$5.00	\$22.00	\$40.00	\$95.00	\$15.00	\$25.00	\$90.00
Light to Medium Blues, Silver Blues and golds wonderful alone or as an accent over other glazes. Add about 1/4 Teaspoon Of Nitrate to pint of Glaze using gloves. Order Nitrate separately, must have nitrate to get luster colors.							
Clear Crackle	\$4.50	\$20.00	\$37.50	\$87.50	\$10.00	\$19.00	\$70.00
Produces nice tight crackles that allows clay color to come through. Works well over and under other glazes. Gloss Finish.							
Copper Sand	\$6.00	\$22.00	\$40.00	\$98.00	\$14.00	\$24.00	\$80.00
This very popular glaze will give you more of a textured surface. You can easily achieve vibrant metallic blues ranging from light to dark with super copper flashes. Copper sand works well with all types of reduction materials. This is one of those glazes you will always get exciting results with. Generally Matt Finish.							
Crusty Rusty	\$6.00	\$22.00	\$40.00	\$95.00	\$14.00	\$24.00	\$80.00
This is a rough textured, multiple colored glaze with a variety of results. Matt Finish.							
Erika's Aqua	\$6.00	\$22.00	\$40.00	\$95.00	\$15.00	\$24.00	\$90.00
Best inside pot or in combination with other glazes, example one brushed coat of Erica's and one brushed coat of Blue Silver Luster. Nice soft colors great for accents and highlights. Glossy purples and wonderful blues. Gloss Finish.							
Gold Luster/Fools Gold	\$4.00	\$17.50	\$30.00	N/A	\$12.00	\$20.00	\$80.00
We also love to use it as an accent over other glazes for variance in colors. We add about 1/4 Teaspoon of silver nitrate to 1 pound or one pint of Glaze. Silver Nitrate is toxic and will stain skin and surfaces; ensure proper protection is used. Gloss Finish. Must use with Silver Nitrate, order Silver Nitrate separately. Gold Luster must be applied heavily, best used on Unpainted Bisque.							
Golden Accent	\$8.50	\$37.50	\$70.00	N/A	\$25.00	\$40.00	\$110.00
A wonderful enhancement to most glazes. We seldom use it alone. Results in brilliant gold tones, reddish highlights, deep purples. Tends to run easily. Gloss Finish.							
Golden Rainbow	\$8.50	\$37.50	\$70.00	N/A	\$25.00	\$40.00	\$110.00
This is a gloss glaze with rainbow colors. Great alone or in combination with other Glazes. This glaze can run.							
Heinz Patina	\$5.00	\$22.00	\$40.00	\$95.00	\$14.00	\$22.00	\$80.00
This textured glaze will give you medium greens with a wonderful array of greens, blues and metallics. Matte							
Litho Carb	\$15.00	\$70.00	N/A	N/A	\$30.00	\$50.00	\$150.00
This Litho Carbonate glaze is a semi matte glaze that produces a wide range of colors from dark purplish hues, yellows, blues and copper flashes. One coat is usually enough. This glaze will run.							
Lizard Skin	\$5.00	\$22.00	\$36.00	\$90.00	\$12.00	\$20.00	\$80.00
This Glaze is full of surprises. One thin coat gives dark colors very Matt. Two regular coats to heavy gives great dark colors that crawl, lots of color flashes. Beware glaze can fall off pot as it dries.							
Warning: Be sure to wear protective clothing, rubber gloves and dust masks when using rare earth chemicals. Note silver nitrate will stain clothing and skin.

Achieves a wonderful smoked pattern, recommend sealing piece when complete to maintain look.Works best on asmooth or burnished bisqued piece. Sponged, dipped or brushed to a thickness of 1/8 inch to 1/4. Allowto air dry until fine line cracks appear in a pattern. Handle very gently after dry to ensure slip resist does not fall off piece. Place in kiln fire then reduce. Remove from reduction while still hot and gently scrape black residue from piece. Matt Finish. Must use Pottery Sealant to save colors. see pg. 102 for recommended brand.							
Turquoise Gloss	\$7.00	\$32.50	\$67.50	\$137.50	\$16.00	\$28.00	\$99.00
Anything from turquoise to red copper flashes. This glaze definitely changes over time. The red copper flashes can be a little difficult to get with this glaze. This glaze settles badly, so we recommend you mix only what you will use each day. We sieve this glaze through at least an eighty mesh screen. Straw is the prefered combustible.							
Tutti Frutti	\$7.00	\$32.50	\$67.50	\$137.50	\$16.00	\$28.00	\$99.00
A perfect Tutti Frutti forms multi color to red flashes to totally red copper. We have even gotten the occasional silver and blues. Glaze can be Matt to gloss depending on how much you use. If green is what you want, expose to more air before placing in reduction material. Greens & Blues. Gloss Finish.							
White Crackle	\$4.50	\$20.00	\$37.50	\$87.50	\$14.00	\$22.00	\$85.00
This is a very dependable crackle glaze that smoothes out easily, with nice soft white colors. The crackle ranges from small tight cracks when applied to the insides of bowls and rims to wider cracks on outside of cylinder shaped pieces Gloss Finish.							
White Matt	\$4.50	\$20.00	\$37.50	\$87.50	\$14.00	\$22.00	\$85.00
On a heavily textured piece try just highlighting texture with white and smoke out in crevices. Also it is very popular on smooth rims or as an accent bead. Will seldom achieve any crackle effect with White Matt.							
Yukio's Rainbow	\$7.00	\$32.50	\$67.50	\$137.50	\$16.00	\$28.00	\$99.00

BRENT WHEELS & EQUIPMENT 2

1/01/22

Electronic speed controls, permanent magnet DC motors and all steel construction are used in our variable speed power wheels (A, B, C, CXC and 16). By varying the speed of the motor electronically, mechanical speed changing systems are eliminated and the foot pedal can be moved about to suit the individual. The reliable control circuit uses high quality components and can withstand a 15 amp load (models CXC, C). Models A and B can withstand a 10 amp load. Our foot pedal is the smoothest in the industry, with speed range from 0 to 240 rpm and exceptional power.

All these wheels are equipped with automatic belt tensioning and belt guards. The steel tables for B, C and CXC are welded from 1/4 inch steel plate for weight and rigidity. All Brent wheels have a cleanable, drip-free working surface. Electric wheels also available in 220 volt, 50 cycle (European Wiring).

MODULAR CONTROL BOX FEATURING:

- Convenient Connections
- Easier to Service
- Reversing Plug
- Improved Torque
- Improved Response

The new control box, now standard on Brent® B, C, and CXC wheels features connectors for the foot pedal and motor. If the foot pedal or motor ever need service or replacement, simply unplug them from the control box. In addition, the motor connector is bi-directional. Simply turning it around and plugging it back into the control box reverses the direction of the wheel. The new control box also improves torque at lower speeds and provides greater foot pedal response.

MODEL B

Designed to fill the needs of school and studio potters, this wheel is competitively priced and is quiet and solid under a load of 25 pounds of clay. The B has a 12" cast aluminum head, the table and drive system of the C. Combined with a 1/3 hp motor for the power and weight necessary for school use.

Splash pan also free Plasti-bat included. B wheels are all reversible and have a state-of-the-art control box with quick-connect plugs on the foot pedal and motor for easy removal if service is needed

PRICE \$2,075.00

MODEL C

The standard no one can match. It centers 50 pounds with a 1/4 hp motor and has a reputation for mechanical efficiency, long life and quiet, vibration-free dependability. The 14-inch cast and machined aluminum head runs on permanently sealed double row ball bearings. C wheels are all reversible and have a state-of-the-art control box with quick-connect plugs on the foot pedal and motor for easy removal if service is needed. FREE Splash Pan and Plasti-bat with C Model.

PRICE \$2,175.00

MODEL CXC

For years the CXC has been our heavy-duty wheel for the potter requiring strong, consistent performance. It features all-steel construction, a tough 1 hp motor, 14" head, a heavy 1/4" steel table, and motor silencer. The 8-groove poly-v drive belt provides the best combination of power and efficiency. The Brent® CXC wheel can center up to 100 lbs. of clay. CXC, C, and B wheels are all reversible and have a state-of-the-art control box with quick-connect plugs on the foot pedal and motor for easy removal if service is needed. FREE Splash Pan and Plasti-bat with CXC Model.

PLASTI-BAT®

Plasti-Bat® was designed by studio potters to be a versatile, long-lasting, high quality bat that is virtually indestructible! Made of 1/4" - 3/8" thick, very rigid, high impact plastic, they will provide continuous use, will not splinter, delaminate, swell or shrink. They are easy to clean and are impervious to water and most chemicals. Plasti-bats drilled with pin holes have one oblong hole for a better fit on your AMACO or Brent wheel. The holes will remain just as drilled and will not become oversized with use. The surface is a non-absorbent, positive adherence surface that does not allow clay to slide or turn loose while centering. Plasti-bats are light-weight, easy to stack, carry and store. Pots removed from a Plasti-bat® have a totally smooth, clean surface.

BRENT SLAB ROLLERS & EQUIPMENT

1/01/22

SLAB ROLLERS

These sturdy machines are constructed of heavy gauge steel pipe and plate, precision machined parts, permanently sealed bearings and aircraft quality cables. The beds consist of masonite shims which can be removed or added to vary the slab thickness from 1/4 inch to 1 1/4 inch (1" for SRC). A canvas covered removable shim that absorbs water from the clay is used so you can peel off the clay slab easily. The entire shim with clay slab can be removed from the bed.

SR-20

Rolls out slabs 20 inches wide and five feet long. Includes three masonite shims: one 1/8" plain and two 1/4" with canvas. The side rails of the SR-20 are now made with 3/16" steel for added strength and rigidity.

PRICE \$3,300.00

SR-36

Rolls out slabs 36 inches wide and 5 feet Long. Includes four masonite shims: one 1/8" plain, one 1/4" plain and two 1/4" with canvas. The side rails of the SR-36 are now made with 1/4" steel for added strength and rigidity. Note on the SR-36 slab roller: Because of the amount of clay and the mechanical pressure that is produced rolling a large slab, we find there are some variables to consider. The middle of the bed bows slightly, creating a slab that is thinner on the sides. This variation is more evident when rolling thinner slabs from 1/2 inch to 3/4 inch.

PRICE \$4,200.00

MINI SRC

Portable, yet extremely sturdy, this slab roller is compact enough to fit on a table while rolling out slabs up to 14 3/4"W x 14 3/4"L . It is constructed of steel pipe and bent plate like the SRC so it will last for many years. The patented cable drive system with opposing rollers produces even pressure along the bed. It includes one 1/4" and two 1/8" thick shims and will roll slabs from 3/16" to 5/8" thick.

PRICE \$995.00

SRC

Ideal for the hobby potter, practical for home and studio use; the SRC can produce slabs 21 inches wide and 40 inches long, in thicknesses from 1/4 inch to 1 inch. Available as either a table model or with easy-to-assemble, screw-in legs. The legs are constructed of heavy wall steel pipe to provide a sturdy work surface. The table with legs is 36 inches high, a convenient height for working with slabs. The simplicity of the patented cable drive system, with its opposing rollers, allows use of a light frame without bed flex. The cable is aircraft quality and is attached to the frame with swivel ends to insure cable alignment and longevity. Although the frame is lighter than our heavy-duty slabrollers (the SR-14, SR-20 and SR-36), the SRC offers the same excellent Brent® quality. All solid steel construction, a solid hardwood handle and the same heavy cotton belting and canvas covered shims. The SRC uses our time-proven shim adjustment to vary the slab thickness. Each SRC comes with six masonite shims: four 1/4" plain; one 1/4" with canvas and one 1/8" plain. One inch thick particle board bed also included.

PRICE \$1,300.00 no legs, \$1,500.00 with legs, Optional leg set \$250.00

SR-14

Can be used on a table top or mounted on the optional leg set. It rolls out slabs 14 inches and 3 feet long. Includes three masonite shims: one 1/8" plain and two 1/4" with canvas.

PRICE \$2,400.00 no legs, with legs \$2,750.00

NORTHSTAR SLAB ROLLERS

North Star Slab Rollers are made in two series: The Standard series used by hobby potters and students everywhere and the massive Super series, at home in industrial, institutional and production settings around the world. The most obvious differences are these: Standard machines are made in '18", 24" and, 30" widths. They have rolls 2 1/2" in diameter, tables are 48" long with the roller in the center and the handle drives the bottom roll directly. Super machines are much heavier, tables are 72" long, rolls are 4" in diameter, there is a 4.33:1 steel gear reduction between handle and roll. They are made 24", 30" and 36" wide, and they come only with a Wagon Wheel handle.

All North Star machines have two rolls, much like the wringer of an old-fashioned washing machine. Both rolls have a small diamond pattern ("knurling") machined directly into the metal to grip the canvas. The bottom roll is turned by the handle, but cannot move vertically. As it turns, it drives the top roll through a train of gears. The upper roll both turns and can be adjusted up and down. The two rolls turning together pull slabs through easily, and the vertical adjustment of the top roll gives an easy-to-set and infinitely adjustable thickness from paper-thin to over 2 inches. A reference scale allows setting and repeating openings to within 1/100 of an inch. The design gives great flexibility in making slabs. Very thin, translucent porcelain slabs and thick, heavily textured architectural slabs are equally easy. A wide variety of other texturing materials and objects can be passed through the machine along with the clay. Slabs can be rolled either direction or reversed on all North Star machines.

In addition to the kilns offered above, other sizes and types of kilns are also available. Contact us to discuss the gas kiln most suited to your firing needs. Two K-26 floors and K-23 walls, arches and doors are standard in Laguna gas kilns. For kilns fired to Cone 10 we recommend upgrading to K-26 brick throughout. For downdraft models, add \$75 to listed upgrade package. Optional hood of 14 gauge galvanized steel may be kiln-mounted or suspended from overhead. Stipulate when ordering. Also available in stainless steel for longer life.

"C" designates single-car kiln.

•The minimum gas pressure to fire a Laguna Gas Kiln is 6" WC. A water column gauge is installed on all kilns.

•If firing with LP gas, inquire about the proper regulator for your application.

Furniture kits are optional and are designed to accommodate a variety of ware sizes. Kits assume high-fire application and are manufactured from a high-refractory mullite/cordite clay body. Call for quote on silicon carbide or other high-end refractory products.

CRESS KILNS

This is an example of one type of kiln available for this company. Please call about a complete listing of all models available.

Manual Kilns

A Models: The A models are square, top loading manual kilns. The A series are great for the beginner.

B Models: These kilns are polygon, top loading manually controlled. The B model kilns offered today are equipped with Kiln-Sitter® timers. On the B models, the Cress Clean Air System (fan) pre-wiring is only available on certain sizes at an additional cost.

C Models: These kilns are square top loading or front loading kilns with gray sheet steel outer skins. The kilns are usually manually controlled (see description above of the B model kilns) but are also offered with electronic controls or with the Firemate® control system.

Digital Kilns

The Cress E-Series electronic kiln features the most advanced electronic control on the market. It provides 5 (rather than 3) preset easy-to-use firing speeds, plus available custom programming capability, for an almost infinitely flexible range of firing profiles. Most "E" series kilns now have 3-zone capable controls, but are initially connected up for one zone. This keeps maintenance to a minimum using one thermocouple instead of three. Temperature uniformity is superb by design and not brute force. Three-zone temperature controls may be ordered at additional cost at the time order is placed. Cress is now the first to include heat reflective stands to greatly reduce the floor temperature when firing.

Firemate Automatic Kilns

The Cress firemate is the most popular automatic kiln on the market today. Its design has been patented in 16 countries for its excellent and unique control system, which gradually increases power to the kiln throughout the firing process.

This provides the advantages of firing as rapidly as possible without heat shocking the ware, and are extremely energy efficient. The firemate even senses and adjust for room temperature and small voltage variations to give you highly repeatable and consistent firing results. The elements are electrically adjusted from top to bottom to give the most uniform firing possible.

The firemate automatically turns the kiln up when you are busy and forget. You have control; fire automatically or fire manually it is simple to operate.

These kilns include: Dawson kiln sitter & limit timer, superior lid brace, two position lid venting prop, insulated peephole plugs, instruction manual and permanently attached instruction plate, patented Cress Firemate control with reduced heath-shock firing curve, thumbwheel power adjustment, auto/manual firing mode switch, heavy gage elements electrically trimmed for superior temperature uniformity, pre assembled kiln stand, lifting handles, steel bottom safety plate, adjustable case clamps reinforced lid band, professional packing for safe deliver

NEW – KilnMaster Touchscreen Option

All Production Series, KilnMaster and GlassMaster models that use a full size touchpad may now be ordered with the new KilnMaster or GlassMaster Touchscreen Controller. The only difference between a KilnMaster Touchscreen Controller and a GlassMaster Touchscreen Controller is the GMT Controller ships with the Ceramic programs turned off to protect you from over firing your kiln.

NEW KilnMaster Touchscreen with Built-in WiFi

Like Your Smartphone, the new KMT controller navigates with just a touch of a finger and allows us to guide you through programming with full sentences, helpful icons, and dynamic navigation.

Built-in WiFi makes it possible to download any software feature upgrades for free so it is like having a new Kiln Controller for the life of the kiln.

A Free App works in conjunction with the WiFi and allows you to monitor your kiln temperature and status from your smartphone. Think how comforting it will be not to get out of bed to be sure your kiln shut off as expected.

The Hinged Controller allows you to move the controller up and down to an angle that is comfortable for you to program. No more getting on your hands and knees. After programming you can push it back down so it is out of your way and easy to view from across the room.

It has the Same Functions you have come to know and love from the standard KilnMaster Controller Plus More!

ConeFire Mode – Allows you to easily program the kiln based on the cone value and whether it is a bisque or glaze firing. Now it is faster than ever. An easy to edit screen lets you quickly change parameters from the last firing and start the program. You can also view the actual segments in the program and display a graph of the firing.

Ramp/Hold Programming Mode – Allows you to easily input your own firing programs. Now you can Name Your Programs and store them in My Programs for easy access. You can even Copy Programs you like, but want to change slightly to speed up the programming process.

Olympic Kilns builds powerful gas production kilns for potters and businesses. Users are provided with equipment that handles large capacity loads with ease, and best of all, is affordable.

Comparing gas to electric kilns is similar to comparing sports cars to sedans. Both will get you where you need to go but the ride is definitely different. Gas kilns are the sports car of kilns. They fire to high temperatures, are high powered and provide the capability to do techniques that cannot be duplicated in an electric kiln such as reduction. Downdrafts have a more complex system than updraft kilns in that their exhaust and intake is at the bottom. These kilns require a chimney or stack to induce enough draft to pull in fresh air for combustion. Olympic builds downdraft kilns as front-loaders and front-loading car designs for convenient loading and unloading

LEAVES

Creating leaf impressions in clay has never been easier. These silicon rubber leaf mats are designed to create realistic leaf impressions in clay and can be used to also create applique pieces. Each leaf is made by hand and therefore is slightly unique from the next, just like real leaves. The veins in these rubber leaves are more pronounced than on real leaves to help transfer the patterns into clay. Often times impressions made with real leaves are covered or distorted by glaze, but the deeper grooves made by these rubber leaf mats will help prevent that distortion.

GLECO TRAP

The Gleco Trap provides you with an economical plumbing trap that is easily installed and maintained. The Gleco Trap is connected below the sink and collects solids in a bottle, which has a fill line. When the solids reach the fill line, the trap is drained through a valve, the bottle is exchanged with a replacement bottle, the valve shut and the trap is back in service. Bottle exchange is rapid and done without the need of tools (less than 2 minutes!). Most of all, there is no mess and less chance of water spillage.
